About Romy Mattens

A counsel in AKD's Banking & Finance team, Romy specialises in Asset Finance, with a particular focus on Ship Finance and Real Estate Finance. She advises on a wide variety of financing structures, ranging from international ship financing and vessel sale and lease transactions to real estate lending, private equity financing, leasing, restructuring, receivables financing, and sale-and-leaseback arrangements.

Her practice covers both the borrower and lender side, acting for national and international companies including banks, financial institutions, sponsors and owners. This dual perspective allows her to anticipate challenges and align the interests of all parties involved in complex transactions.

Romy has been closely involved in many cross-border deals, where her experience navigating multiple legal systems and financing structures adds clear value for clients. Whether structuring large-scale fleet financings or advising on real estate portfolios, she combines technical knowledge with a practical, commercial approach.

Clients consistently praise Romy for her responsiveness and pragmatic solutions, qualities that are particularly valued in the time-sensitive environment of financing transactions. Her goal is to deliver clear, actionable advice that helps clients move forward with confidence.
